

24 June 2022

Example

```
var http = require('http');
```

Create a server

```
http.createServer((req, res) {
```

```
  res.write('Hello world')
```

by using this method we
can response to the
client

```
res.end() // by using this we have  
end the response
```

```
}).listen(9000);
```
